Euro Sandow

Euro Sandow is one of the leading producers for custom made elastic nets, shock cords, bungee cords, elastic straps, luggage and floor nets for a wide variety of securing applications. Most of the products are designed for the automotive industry as a 2nd tier supplier.

MDE Converting

We are a converting company for foams, adhesive tapes, temporary protection film. We can provide different type of sealing solutions, bonding solutions, specialty tapes for sound dampening or thermal protection. We are based in Romania, established in 2008 and we are converter and distributor of self adhesive tapes, foams, protective films, foils and other flexible materials. Our core business is converting these materials into bespoke components with a large area of applicability for different industries: Automotive, Electronics & Electrical, Appliances, Healthcare, Industrial, Aerospace. Our converting capabilities also include: die-cutting, kiss cutting, specialty slitting and rewinding rolls to any size and length, laminating, multi-layer laminating, sheeting flexible materials, tabbing, laser cutting, guillotining, X/Y axis plotter, R&D.

E-Cablaje

E-Cablaje is one of the main Romanian producers of electrical cables, control cables, brake and clutch, for motor vehicle, cords and leads, insulated, electric, with moulded-on plugs, cable assemblies, wiring harnesses/looms and cable connector assemblies.

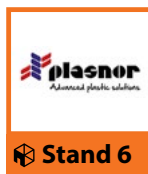

Tri-Wall Romania

We are a global company with more than 60 years presence on the market working to deliver locally the best packaging solutions that : Save time and labour Reduce costs Improve efficiency Support sustainability through our customers' supply chain. We produce heavy duty packaging for big industrial products or small, fragile ones for delivery on a global scale – locally, nationally and internationally.

Zaleco

We, at Zaleco, have grown into more than just a packaging company; we are a community of inspiring people, bound by the entrepreneurial spirit, and empowered to make a difference. We understand that creating a packaging solution is not just about encasing a product; it's about wrapping up a brighter, more sustainable future for generations to come. From sourcing ethical materials to implementing energy-efficient manufacturing processes, our commitment to bettering the planet is unwavering. As we look to the future, we are excited to continue our journey with you. Let's grow together, shaping a landscape filled with not just packages, but promises—promises of quality, integrity, and a sustainable world. Thank you for trusting us to be a part of your story!

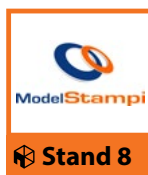

Plasnor

Plasnor is a company with 50 YEARS of experience in the plastic transformation industry. We are a leading company within the sheet EXTRUSION and VACUUM THERMOFORMING sectors, standing out for our ability to develop plastic materials and the flexibility of our production system. Plasnor is well known for offering personalised solutions, according to the needs of our clients. It takes different R+D+i projects in order to create new materials, new applications, new manufacturing processes and new services. In Plasnor we have our own in-house laboratory for producing colour concentrates (masterbatches), which makes us colour specialists. Own Tech department and tooling manufacturing experts.

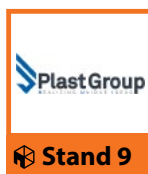

CRG Industry Service

We support technological evolution through innovative optimization systems in order to develop as many solutions as possible to improve the production process in as many fields of application as possible. From CAD design, to CAM programming for mold making. CRG uses collaborations with the best professionals in the mold sector, from prototype mold to series production molds for any sector (Automotive, Home Appliances, Electrification, etc.) With extensive experience in making Control Devices, we provide our partners with the best solutions to support their needs.

Model Stampi

Since 1999, Model Stampi has been a trusted specialist partner specialized in the manufacture of thermoplastic injection moulds for prototypes and series production, in aluminium or steel, for the automotive sector as well as for other markets including motorbike, household appliances, furniture, industrial and healthcare. Starting from moldflow and product feasibility study, moving on to mould construction and ending with the production of the plastic part, we support our customer throughout the process development.

Plast Group

Plast Group is a leading supplier of plastic components and injection moulds able to meet the requirements of the most demanding markets. We have more than 45 years of know-how and experience in injection moulding and tools manufacturing. Our capabilities include also: painting, tampoprinting, serigraphy and different assembly lines. Our mission is to Realize Unique Ideas through Group innovation approach, professional team, passionate attitude and Company values in order to develop our legacy of the family business.

Inmaacro

INMAACRO is the technical and commercial representative of companies from Germany, Switzerland, Holland, Italy and Taiwan which are producers of machine tools, measuring and control machines, cutting tools, accessories and software. Also, INMAACRO manufactures custom made tools, custom made clamping devices for machine tools and coordinate measuring machines, molds, precision parts, automation. Our specialists realize customer specific applications, commissioning, trainings, service, calibrations, turn-key projects, CAD design, CAM programming, measuring and control of parts, production start-up and AUKOM training.

TAUROS

Stand 11

Tauros

Tauros company founded in 1999 with main activity international and national general cargo transport. First new trucks bought in 2002.

- Qualified team and ready to offer best solutions for our customers.
- Escalation matrix for each client
- SOP for each customer
- 24/7 available Core business- automotive industry- 92%. In case of overcapacity requested by our customers, we offer the freight forwarding solution by using our partners for domestic and international transport.

K. FACTORY
all about operational performance

Stand 12

KFactory / Kognitive Manufacturing TECH

KFactory is a company specialising in the development and commercialization of Industry 4.0 digital solutions for advanced manufacturing. KFactory's deep-tech solutions are intended to assist production companies in achieving overall equipment efficiency, IT&OT integration, and compliance with manufacturing standards and regulations. The company's digital solutions are targeted at increasing operational efficiency and sustainability, assisting businesses in meeting their manufacturing objectives, and paving the road for a brighter future.

MOLGROUP
CHEMICALS

Stand 13

MOL Plc

MOL Group, a leading integrated oil, gas, and petrochemicals company, is on a transformative journey. Our 2030+ Strategy aims to turn us into an efficient, sustainable, chemicals-focused industry leader by the next decade and achieve net-zero emissions by 2050. Expanding into specialties, we're not just about polymers; we're seizing opportunities in compounds for the automotive, home appliances, electronics, and furniture industries across Europe. Explore our innovative compound product portfolio, featuring homopolymer and copolymer-based PP compound grades with advanced fillers like glass fibers and minerals. Join us in redefining industries and forging a sustainable future!

DLOG
DECOMAR LOGISTICS

Stand 14

DLOG

DLOG is a proactive and dynamic organization that offers high-end quality services, expertise in:

Quality control, Quality engineering, Logistics services, Project management. The Team is driven by qualitative principles and by ethical business approach with an international profile.

MONTIPOWER
Advanced Preservation Technologies

Stand 15

MONTI-Werkzeuge

MontiPower® is part of the Monti Group. The Monti Group contains our companies MONTI-Werkzeuge GmbH, Hennef Bonn, Germany MontiPower B.V., Kolham Groningen, The Netherlands MontiPower Americas Inc, Manassas, Virginia, USA MTEST, Houston, Texas, USA ActiVet® Petcare Decapower® retail Products Monti Group is located in the Netherlands and majority owned by a The Preservation Holding AS from Norway. Preservation Holding AS is a Norvestor company.

AXA

Stand 16

AXA Entwicklungs- und Maschinenbau

AXA is one of the most successful medium-sized companies in machine and plant construction in Germany. We not only manufacture the machine beds and machine panelling ourselves, but also the important core components such as main spindles, swivel heads, travelling columns and cross slides as well as the machine portal, tool changers, rotary tables and even complex clamping fixtures. Our expertise begins with the planning, development and design of fixtures and components and extends to the manufacture of parts for the assembly and installation of the machines at the customer's premises. The high level of vertical integration enables us to quickly implement our customers' change requests and realise design improvements.

PLANIMOLDE

Stand 17

Planimolde

Since 1978 Planimolde has held a very strong position in the MouldMaking Industry worldwide. Planimolde is specialized in medium sized injection moulds & plastic parts and was the first Portuguese Mould Maker to have its quality system certified according to ISO 9001. High Quality, Precision, State-of-the-Art Technology and a Specialized Team guarantee you the best results, meeting your specific requirements.

ITC

Stand 18

Institut pro Testování a Certifikaci

Institut pro Testování a Certifikaci (Institute for Testing and Certification) is the Czech independent company with a worldwide sphere of authority providing services in the area of testing, certification, technical inspection, metrology and standardization.

AWS
ELEKTROTEHNIK

Stand 19
Stand 20

AWS Elektrotechnik

AWS Elektrotechnik proposes reliable solutions for equipment and systems used in most of the areas that form the industrial sector. The company, founded in 2012, is backed by the expertise of a team of professionals with extensive experience gained from the sustained activity in all the specific stages of the industrial segment. Through its strengths, the company provides more than equipment and parts for industrial machinery, also coming with an element that adds important value, namely pre- and after-sales services. Regarding the sale of industrial equipment and supplies, we are authorized distributors for a number of international brands well-known in the field, allowing us to cover an extremely wide range of industrial segment needs.

ingun

Stand 21

Ingun

World leading supplier of test solutions in electronics manufacturing. With a large portfolio of test probes, Fixture kits and Customising Accessories, we are eager to fully support our Customers and be a reliable Partner for Future Technology!

ABICOR
BINZEL

Stand 22

Abicor Binzel Romania

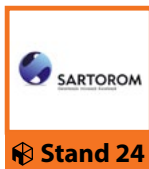

ABICOR BINZEL supplies for all working materials and applications the exact welding or cutting torch necessary. For the manual use or for the semi or full automatic operation. Air or liquid cooled. Wide range welding accessories as well as robotic peripheral systems.

Foerch

Present on the Romanian market since 2008, FOERCH Romania is one of the top companies with direct sales of consumables, assembly and anchoring items for workshops and industry. Whether we are in the automotive, construction, metal, industrial or enterprise workshops, FOERCH is your competent advisor and partner for your workshop needs as well as for fasteners and fittings.

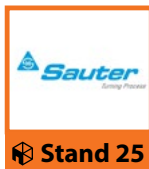

Stand 23

Sartorom Impex

Sartorom, the first laboratory equipment company founded after 1989, with fully Romanian capital, celebrates 30 years of activity in Romania. Our services focus on delivering complete solutions for laboratories in all industries, including research and development, production or quality control. We are the first supplier of laboratory instruments in Romania to be ISO 9001 certified and ISO 17025 accredited as a calibration lab.

Stand 24

Sauter Turning Process

We manufacture turned parts and assemble assemblies for every customer and industry, whereby our core competencies are not only in the implementation of customer products, but also in process development and process management. We are happy to support our customers with our competence team right from the development of the "ideal" turned part for the assembly in order to achieve the most economical result right from the start. Sauter Turning Process develops complete manufacturing and logistics solutions for turned parts and assemblies.

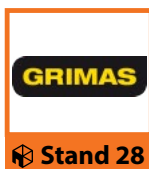

Stand 25

Gotec Rom

Gotec Rom is specialized in metal and plastic parts surface treatment and coating of rubber - metal parts with bonding agent, as well as production of blank metal parts on CNC lathe and plastic injection molded parts. Available surface treatment processes: ZnNi treatment on racks with or without sealing; ZnCa Phosphating and Aluminium Phosphating in drums; Degreasing: alkaline or with Perchlor steam; Shot blasting; Bonding agent application.

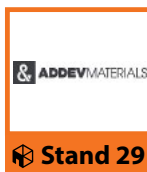

Stand 27

Grimas Control

GRIMAS Control is a privately held multinational company, which was founded in Romania in 2008 and it is part of the group GRIMAS companies, Austria and Hungary. The company provides a wide range of control and measurement equipment for destructive and nondestructive control with applications in various industrial fields such as: automotive, aerospace, petrochemical, civil and military shipyards etc. We are constantly looking beyond customer's expectations in order to deliver market leading products wherever they are needed. We provide specialized business solutions that improve quality, safety and productivity and reduce risk. Our sales representatives and customer care team with over 15 years of experience strives to bring you the best customer service and can help you solve tough inspection problems. Our quality control equipments ensures the safe and efficient operation of your equipment and assets by detecting defects before they result in severe damage, and assures compliance with international standards.

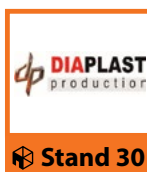

Stand 28

Addev Materials

ADDEV Materials specializes in the processing and distribution of high-performance materials for a wide range of industrial markets. ADDEV Materials is a designer and manufacturer of customised sustainable material solutions for industrial performance. We provide the best technical material in a customised form for a specific application. As a total solutions provider, we combine our expertise in advanced materials (tapes, films, adhesives and chemicals) with our knowledge of converting to improve our customers industrial and supply chain performance.

Stand 29

Diaplast Production

DiaPlast Production has over 18 years of experience in plastic injection molding, extrusion and assembly. We are a leading supplier of plastic components for different industries, able to fulfill higher standards of fabrication/ manufacturing, quality, packaging and logistics, specific on different markets. Our know-how, specialized team and technical capabilities allow us to assure for our customers complete services at higher standards.

Stand 30

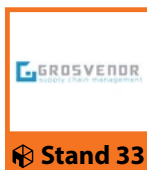

Molex

For 80 years, Molex has been driving innovation in electronics, supporting industries from Automotive to Healthcare and Consumer to Data Communications. Our customers rely on Molex to deliver breakthrough connectivity at scale. We help them master change and create the most important advances through powerful innovation, engineering excellence, end-to-end supply chain optimization, and world-class manufacturing capabilities. We believe in the transformative power of creating connections. We use innovation, engineering excellence, commitment to quality and reliability and superior customer experience to improve communication, elevate experiences, and engage and inspire people everywhere.

Stand 31

Stand 32

Grosvenor SCM

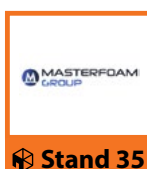

Grosvenor SCM, with the Head Office in Romania and operations in 6 countries, is one of the most important distributor in Electronic & Automotive Industry. With an experience of 18 years in the market we, continuously, adapt and improve our portfolio of products and services to help our customers in any demanding situation. During the years, we developed strategic partnerships with leading manufacturers, helping us to serve our customers in Eastern European market at the highest level.

Stand 33

Stand 34

Stand 63

Stand 64

Masterfoam

Foams and Flexibles Converter. The Masterfoam Group, founded in 1964, has solved many challenges related to the production and manufacturing of flexible materials such as foams, foils, felts and filter materials for years. Ranging from the automotive industry (with sealing and NVH solutions), to cushion packaging, filtration and industrial applications, Masterfoam converts soft foams, cell rubbers, foils and fleece materials for almost any industry today.

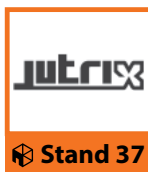

Stand 35

Danutek Balkans

Your Partner for Success in the Electronics Industry - Innovative Equipment, Services, and Support.

Stand 36

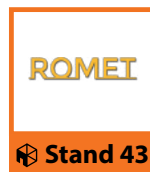

Jutrix UAB

Jutrix is the leading supplier of stamped, formed, deep drawn parts according to customers drawings. Our core competence is progressive coil stamping. Production base is over 40 different presses from fully automatic lines 300 t to the single press machines from 3 t up to 1000 t; hydraulic presses - 100-250 t. Tool shop in-house. From prototypes to mass production. Products assembly by pressing, riveting, welding.

Quality: ISO 9001, ISO 14001 and ISO 45001 certified. Working in compliance with LEAN, 5S, APQP, 8D problem solving, PPAP, FMEA, PPM control.

Market served: Electronic - Automotive - Household appliances - Furniture - Electrotechnical - Railway - Medicine - Aviation and other industries.

Romet

ROMET is a solid Italian-Romanian company, which is a part of an industrial group that for 40 years has worked in the field of cutting, punching and welding metals. The know-how acquired over time, ensures solving various problems encountered and customer's needs. Romet is specialized in working with progressive dies with presses up to 650 tons with working plans of 2500x1250 mm with electronic power supplies, with a maximum width of 750 mm and a thickness of 4 mm and rolls of 4 tons. Our technical department is able to manage equipment for producing parts from stainless steel sheet, pre-painted, galvanized and aluminized.

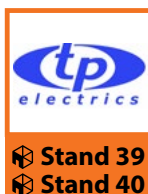

Craemer

The Germany-based Craemer Group is an international family-run company specialising in the core businesses of metal forming, plastics processing and tool making. The headquarters is Craemer GmbH, founded in 1912 in Herzebrock-Clarholz. Craemer Group has three additional production sites in Europe and a global network of its own sales offices and partners. In 2022, Craemer employed around 1,000 staff and achieved a total operating performance of around 372 million Euros.

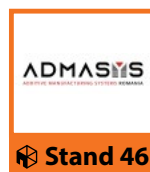

Rezolv Energy

Rezolv Energy is a highly experienced, independent producer of renewable energy, providing subsidy-free clean power at a stable price in a long-term for industrial and commercial users. Our customers include well-known commercial and industrial businesses, as well as other off-takers operating across Central and South Eastern Europe. Our business is built on a heritage of 15 years in clean energy and our senior team has decades of experience in the sector. We take renewable energy projects from late-stage development through construction and into long-term operation. Our team previously created and operated the largest wind farms in Croatia and the Czech Republic, and the largest independent wind farm in Romania.

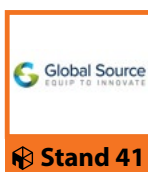

TP Electronics

Manufacturing and assembly of electrical cable harnesses, electronic components and modules.

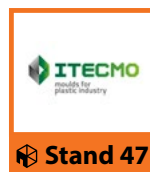

Admasys RO

We provide the most extensive selection of 3D technologies available in the Romanian market, encompassing high-quality 3D printers and accessories, portable and metrological 3D scanners, software, consumables, materials, along with professional services ranging from expert consulting to bespoke solutions. Our offerings include everything from 3D printing, scanning, and modeling to comprehensive training, servicing, and friendly technical support, tailored to meet the specific needs of manufacturing companies.

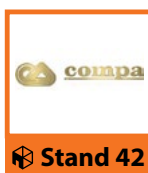

Global Source

Global Source is a high level technology equipment and solution provider for all industrial and laboratory requirements. We offer personalized solutions for inspection, measurement, testing requirements, and design and development for technical furniture. Being a supplier of state-of-the-art equipment, the company has a diversified, unique brand portfolio, from top producers such as Hirox, Ash, Inspecto, Motic, Jenoptik, Viking and others. Along with the digital microscopes we are proud to serve successfully in various configurations laboratories and production lines, we also present automatic robotic inspection system, based on Artificial Intelligence and Deep Learning.

Itecmo

ITECMO is specialized in the development and manufacturing of injection moulds for plastic industry. We stand up for the demanding changes in the mould industry to supply personalized and full service satisfying our clients' demands. The combination of industry experience gained by our operators and skilled technicians along with investment in modern equipment give us the ability to develop different types of molds such as: bi-material moulds, gas-assisted injection moulds, water-assisted injection moulds, prototype and many others. Itecmo provides the highest service level to their clients, starting with 3D design, programming, machining, assembly and try-outs, including rheological studies in a complete partnership with our clients. Here you will find the answers you search for, thanks to our highly motivated team waiting on new challenges to give shape to new ideas.

Compa

We are a company with more than 135 years of experience in metal manufacturing industry. Main type of products that we manufacture, from the many fields of industries that we cover:

- Subassemblies and components for the injection system;
- Turbocharger components;
- Pinions for the steering box;
- Subassemblies and components for the steering gear, steering box and steering column;
- Powertrain components;
- Components for wiper screen system;
- Stamped parts;
- Cold-coiled springs;
- Hot forged parts;
- Mechanical welded structures & cabins

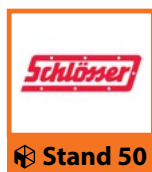

Master LTD

MASTER Ltd is a company, that has proven itself in the sphere of industrial automation, with activities as: Manufacturing of machines and production lines for assembling of automotive components, Automation of technological processes, Trading resources for automation, Maintenance Service

Mora IPR

Mora IPR is part of MORA groupe, is a high-tech industrial group specializing in the production of injected parts made of thermoplastic materials for the automotive field. Founded in France more than 50 years ago, the group is also present in Romania and works in close collaboration with leading clients.

Schlösser

Schlösser GmbH Co KG has many years of experience in the field of producing stamped parts, water jet parts and laser beam parts. These technical parts are destined for sealing, venting, shielding, cooling, adhesive bonding, dampening and insulating and are produced in different geometries according to the customers drawings and their requirements. Sector solutions provided with Schlösser parts - Automotive, Electrical / Electronics, Construction / Sanitary, Mechanical Engineering.

ELBA

ELBA's vast experience in the automotive industry led to a considerable specialised know-how. Currently, due to important investments in technology, ELBA is fully aligned to the automotive industry's demands. The automotive production site is almost 19.000 ms wide and is specialised in the production of vehicle headlights and rear lamps. Our in house Research and Development department covers all the design and concept development activities. These meet the standards of the APQP procedures, based on the concept of project management. The employees are continuously trained, and have modern methods of design at their disposal. Project development is done in accordance with the ISO/TS 16949 standard and the in-advance planning procedure of the quality of our products.

Axon' Cable SAS

Axon' designs and manufactures innovative cabling, interconnect solutions, cable assemblies, connectors and mini systems for automotive and high tech applications.

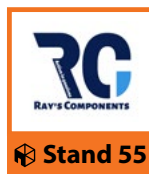

TotalEnergies

TotalEnergies is a global multi-energy company that produces and markets energies: oil and biofuels, natural gas and green gases, renewables and electricity. Our 105,000 employees are committed to energy that is ever more affordable, cleaner, more reliable, and accessible to as many people as possible. Active in more than 130 countries, TotalEnergies puts sustainable development in all its dimensions at the heart of its projects and operations to contribute to the well-being of people. TotalEnergies Marketing Romania manages three lines of activity: lubricants, bitumen and special fluids, the central commercial office in Bucharest, the lubricants production factory in Cristian - Brasov, the bitumen storage warehouse in Ozun-Covasna.

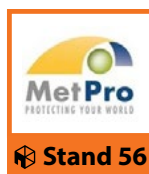

CERC-Timisoara

The overall objective is to support the implementation of a package of services and training programs for the benefit of enterprises in the sector. The strategic objective is to achieve the national benchmark status within the DKMT region in the field of innovation and know-how transfer for the automotive sector.

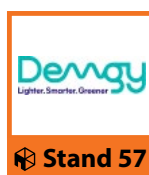

Ray's Components

Ray's Components is a key player in the electronic components market, serving Hungary, Romania, and Slovenia. As a trusted regional sales representative, we bridge the gap between renowned manufacturers and customers, offering top-tier customer support and expertise. Our carefully curated portfolio includes resistors and shunts from KOA, capacitors from Jianghai, connectors from Adam-Tech, and DC contactors from Altran Magnetics. These collaborations highlight our commitment to excellence, ensuring superior quality and an unwavering dedication to customer satisfaction. Partnering with KOA guarantees a reliable source for resistors and shunts, while Jianghai's capacitors bring cutting-edge technology.

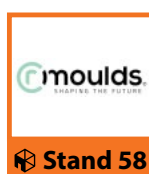

Industrial Mecano

MetPro's reliable leading-edge technologies for corrosion protection and export packaging are used all over the world to bring high-quality industrial products safely to their destination. Whether temporary corrosion protection, long-term preservation or transport protection, MetPro has the right solution to protect against corrosion, moisture, dust and transport damage, from manufacture to use. Especially the unique BioVCI® in our BioCor® products offers packaging innovation that is essential today.

Demgy

Our MULTIPLASTURGY® concept allows us to simplify, LIGHTEN and implement your plastic projects, even the most complex. Expertise of the two factories in Romania (Fagaras and Deva): Thermoplastic injection •Technical and decorative parts •Over molding of inserts metallic •Gas assisted injection •Sequential injection Decoration •Painting (water based and solvent based) •Tampo printing •Laser printing •Serigraphy •Hot stamping •Roctool technology Chrome plating •Cr6 and Cr3 technology (for plastic parts) Metal Electroplating •Zinc coating (for metallic parts) Assembling •Manual and semi automatic assembly •Ultrasonic welding & assembly •Screwing •Control with vision systems Machining of plastic and metal.

CR Moldes

CR Moldes is a company with 20 years of expertise on manufacturing moulds for plastic injection moulding. It's a company that invests on technology and know-how to answer to the most demanding requests of the market. CR Moldes, Lda promotes a distinct support to it's customers, being present on its facilities whenever needed. The company is committed with quality control, which considers a key point to achieve efficiency and continuous improvement.

DS Smith Packaging Romania

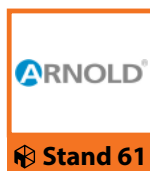

DS Smith is a leading provider of sustainable fiber-based packaging worldwide, which is supported by recycling and papermaking operations. It plays a central role in the value chain across sectors including e-commerce, fast moving consumer goods, and industrials. Through its purpose of 'Redefining Packaging for a Changing World' and its Now & Next sustainability strategy, DS Smith is committed to leading the transition to a low carbon, circular economy, delivering more circular solutions for its customers and wider society – replacing problem plastics, taking carbon out of supply chains and providing innovative recycling solutions. Its bespoke box-to-box in 14 days model, design capabilities and innovation strategy sits at the heart of this response.

Electrolytic Coating

Founded in 2013, Electrolytic Coating has established itself as one of the leading companies for surface treatment in Romania, currently supplying local and external customers. We're providing high alloy zinc coating (ZnNi) on metal parts for automotive industry under IATF16949 certification. Technology available: rack and barrel.

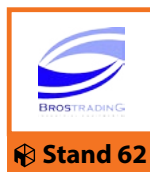

Stand 60

Arnold Umformtechnik

Companies active in the mobility and high-tech industries who are looking for intelligent fastening solutions, functional components and appropriate processing systems, know us to be an expert development partner, and value our problem solving capabilities. Under the brand name of BlueFastening Systems ARNOLD supplies fasteners and perfectly harmonised complete systems, that quite literally guarantee maximum stability and safety in these dynamic times. Sustainability is in ARNOLD's DNA, manifesting itself in a variety of ecological, economic and social activities. The ACO2-Save program means that we can reduce CO2 output, reduce costs, and improve fastening performance.

Stand 61

Bros Trading

Bros Trading is a company specialized in the commercialization of components for industrial automation.

Stand 62

Kimet

KIMET SRL as the exclusive representative of several companies in the EU and USA, KIMET delivers: Measuring and control machines and devices (3D Optical Coordinate Measuring Machines, DIATEST high precision instruments for bore measuring, hardness testers, roughness testers, instruments for measuring the thickness of materials, the paint coating thickness, etc.) Spectrometers for alloy composition analysis Non-destructive testing materials, accessories and devices (penetrants, magnetic particles, industrial films, automatic and semiautomatic magnetic and penetrant testing facilities, devices and detection panels for digital and computerized radiography, traditional X-ray and gamma ray equipment, ultrasonic flaw detectors, video endoscopes) Digital probes, high precision magnetic position sensors, digital display measuring scales Industrial marking products (permanent paint markers, temperature indicators, etc.)

Stand 65

Optima Metal & Engineering Solutions
