Energy

Energy is an independent renewable energy provider dedicated to supplying its customers with reliable, affordable, long-term green energy. With a diversified green fleet currently generating almost 700 GWh of clean electricity from 490 MW and powering 277 706 households, Energy is at the forefront of driving the CEE region's transition to sustainable energy. The company's ambitious plans include ongoing development projects with more than 8 GW in 11 countries. With its diverse and multidisciplinary team of 30 nationalities, Energy is focusing on developing, constructing, and operating renewable energy projects by integrating environmental, social, and governance (ESG) factors into every aspect of day-to-day business.

**Stand 1
Stand 2**

E-Cablaje

E-Cablaje is one of the main Romanian producers of electrical cables, control cables, brake and clutch, for motor vehicle, cords and leads, insulated, electric, with moulded-on plugs, cable assemblies, wiring harnesses/looms and cable connector assemblies.

Stand 3

Portwest

On celebrating 120 years of peak protection Portwest has possessed an unrelenting ambition to produce the world's most trusted and requested protective wear. Through the decades, Portwest has continuously proven their dedication to quality, producing world-beating safety garments, foot protection, hand protection and PPE, while pushing the boundaries in protection technologies. Technologies that make the workplace a safer place.

Stand 4

Zaleco

We, at Zaleco, have grown into more than just a packaging company; we are a community of inspiring people, bound by the entrepreneurial spirit, and empowered to make a difference. We understand that creating a packaging solution is not just about encasing a product; it's about wrapping up a brighter, more sustainable future for generations to come. From sourcing ethical materials to implementing energy-efficient manufacturing processes, our commitment to bettering the planet is unwavering. As we look to the future, we are excited to continue our journey with you. Let's grow together, shaping a landscape filled with not just packages, but promises—promises of quality, integrity, and a sustainable world.

**Stand 5
Stand 26**

Hennlich

HENNLICH is a Romanian-Austrian company, part of the HENNLICH GROUP, an entity with a 100-year history, present in 18 European countries. The company distributes products manufactured both within the group and of other external partners that it represents, supporting the industry with high quality products, with equipment for last generation machines and technical solutions.

Stand 6

Pladent

Pladent is a family business with a long tradition and excellence in the field of plastic casting, which was later extended to processing and converting of single-sided and double-sided adhesive tapes and foam materials. The company is distinguished by long experience, ingenuity, quick response, flexibility as well as by creative energy and nonstandard approach to the challenges. We have designed our own in-house machines to achieve optimal solutions to our customers' needs, we also offer technical support and advising. We operate in the fields of vacuum forming, processing single-sided and double-sided adhesive tapes and foam materials (e.g., PE, EPDM, PUR). Using various technologies, we offer high-quality, custom-made products to our clients, delivering materials cut and prepared to be as optimal as possible for production use.

Stand 7

**KFactory /
Cognitive Manufacturing TECH**

KFactory is a company specialising in the development and commercialization of Industry 4.0 digital solutions for advanced manufacturing. KFactory's deep-tech solutions are intended to assist production companies in achieving overall equipment efficiency, IT&OT integration, and compliance with manufacturing standards and regulations. The company's digital solutions are targeted at increasing operational efficiency and sustainability, assisting businesses in meeting their manufacturing objectives, and paving the road for a brighter future.

Stand 8

Mora IPR

Mora IPR from Medias is part of the Mora International group, being an experienced manufacturer in the injection of thermoplastic material products, for various industries, especially the automotive industry. Our experience allows us to simplify and implement plastic injection parts projects, even the most complex ones. The experience of the Mora IPR Medias team, in the injection of plastic parts, is at a high level, both for technical parts and for decorative parts. The experience in the injection process is complemented by the assembly department where there is expertise for: • Insertion of metal inserts • Pad printing • Ultrasonic welding • Manual, automatic and semi-automatic assembly • Different control systems depending on the application.

Stand 9

Univet Safety

Univet is an Italian manufacturer of protective eyewear, present in 68 countries and occupying a top position in Europe. With an experience of more than 25 years, Univet provides unique designs and excellent treatments for the glasses protecting workers in various industries: automotive, construction, chemical, steel, food and beverage, etc. In Romania, Univet occupies the top position as safety eyewear provider, some of our customers being: Ford, Dacia, Pirelli, Continental, OMV Petrom, Astra Greenbrier, Damen Shipyard, Ursus Breweries, Corteva, s.o. Univet has a wide range of glasses with and without dioptries, covering the wide majority of industrial applications, including welding and metal working. Our prescription protection eyewear are certified according to the European Legislation and are custom produced in Italy.

Stand 10

Euro Sandow

Expert in textile transformation since almost a century, Eurosandow designs and manufactures for the automotive, railway, aerospace industries, cords, straps and nets of quality all while offering innovative solutions to their clients to allow them to respond to their technical expectations.

FedEx

Our history dates back to 1965 when our CEO and Chairman Frederick W. Smith, then a Yale undergraduate, designed a cutting-edge new system that would allow for the safe delivery of time-sensitive shipments. Within a decade, he had established Federal Express Corp., – the world's first overnight delivery company, changing the transportation industry forever. Entering Europe in 1984, FedEx Express currently serves hundreds of cities and markets with its intercontinental and international express delivery services. In 2016, FedEx acquires TNT Express. The acquisition combined the strengths of the companies – the world's largest air express network and an unparalleled European road network, which expanded the existing FedEx portfolio and reshape the global transportation and logistics industry.

KVK Kunststoffverarbeitung Koetke

Kunststoffverarbeitung Koetke GmbH Blow Molded Parts and Systems for Technical Applications Wide product portfolio in different industries. Experience with all common standard resin sand, also with special materials for sophisticated application ranges. Extrusion blow molding machines for products from 2 ml up to 100 l.

Gruner Serbian

"Gruner Serbian" is a company that provides agility-driven services, dedicated start-up support, and comprehensive realization services, ensuring a seamless path from concept to production, in order to empower our customers to transform innovative ideas into tangible business success, driving quality and value at every step. Since our establishment in April 2007, "Gruner Serbian" has grown from a trusted assembly partner to a comprehensive provider of advanced industrial solutions, positioning itself as a valuable member of the Gruner Group's global network and a reliable partner for customers worldwide.

Altas Kalip

Altaş Fineblanking, located in Bursa, Turkey, specializes in the production of fineblanking components for the automotive industry. The company operates 11 fineblanking machines with capacities ranging from 80 tons to 800 tons, utilizing a variety of raw materials, including aluminum, stainless steel, copper, and steel.

Lord Industrial Tools

Founded in 2000, Lord Industrial Tools provides highly competitive industrial storage solutions, professional maintenance tools and adhesives, complete and innovative personnel hygiene solutions. Our commitment is properly to cover a complete range of products and services therefore we developed our own production capacity in metal fabrication and now we are able to provide even customized solutions regarding this area.

Ejendals AB

Ejendals is a Swedish heritage brand, founded in 1949 by Valfrid Ejendal in Leksand. We specialise in developing, manufacturing and marketing premium quality safety products that protect both hands and feet, helping create a safer everyday life in tens of thousands of workplaces throughout the World. Our Vision Zero injuries to hands and feet, for the benefit of the employee, the company and society.

Gotec Rom

Gotec Rom is specialized in metal and plastic parts surface treatment and coating of rubber - metal parts with bonding agent, as well as production of blank metal parts on CNC lathe and plastic injection molded parts. Available surface treatment processes: ZnNi treatment on racks with or without sealing; ZnCa Phosphating and Aluminium Phosphating in drums; Degreasing: alkaline or with Perchlor steam; Shot blasting; Bonding agent application.

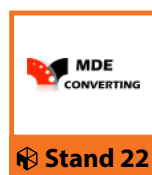

Hamann

Hamann imports and distributes products specific to manufacturing processes, maintenance activities in the industrial sector and those who perform maintenance and repair work for cars, trucks or agricultural machinery.

Pregis Protective Films & Coatings

We are a leading manufacturer of innovative packaging solutions and protective products. We solve our customer's toughest business challenges with packaging so they can create customers for life. We do this by delivering creative solutions to packaging challenges and leveraging a material neutral portfolio.

MDE Converting

We are a converting company for foams, adhesive tapes, temporary protection film. We can provide different type of sealing solutions, bonding solutions, specialty tapes for sound dampening or thermal protection. We are based in Romania, established in 2008 and we are converter and distributor of self adhesive tapes, foams, protective films, foils and other flexible materials. Our core business is converting these materials into bespoke components with a large area of applicability for different industries: Automotive, Electronics & Electrical, Appliances, Healthcare, Industrial, Aerospace Our converting capabilities also include: die-cutting, kiss cutting, specialty slitting and rewinding rolls to any size and length, laminating, multi-layer laminating, sheeting flexible materials, tabbing, laser cutting, guillotining, X/Y axis plotter, R&D.

AFTC

AFTC specializes in high-performance, cost-friendly double adhesive acrylic foam tapes, providing quality products that address different markets: automotive, industrial, construction, electronics, etc.

CERC-Timisoara

We are a company from Timisoara City. The overall objective of CERC-Timisoara is to support the implementation of a package of services and training programs for the benefit of enterprises in the sector. The strategic objective is to achieve the national benchmark status within the DKMT region in the field of innovation and know-how transfer for the automotive sector.

Stand 24

Aectra Plastics

AECTRA Plastics, with a history of more than 22 years, is a well renowned and leading distribution company in the petrochemicals industry for the Regional market. The distribution consists in commodity polyolefins and engineering and technical polymers alike, products that are sourced from global production companies like: Sabic, Epsotech, Senoplast, KEP, DIC, Radici, MCPP, MOL. As specialized distribution companies, with a major influence in the local market, AECTRA Plastics and PINTAPLAST became part of Hromatka Group, thus having the recognition of being an important player for the regional market.

Stand 25

Molex

For 80 years, Molex has been driving innovation in electronics, supporting industries from Automotive to Healthcare and Consumer to Data Communications. Our customers rely on Molex to deliver breakthrough connectivity at scale. We help them master change and create the most important advances through powerful innovation, engineering excellence, end-to-end supply chain optimization, and world-class manufacturing capabilities. We believe in the transformative power of creating connections. We use innovation, engineering excellence, commitment to quality and reliability and superior customer experience to improve communication, elevate experiences, and engage and inspire people everywhere.

Stand 27

Stand 28

Global Source

Global Source is a high level technology equipment and solution provider for all industrial and laboratory requirements. We offer personalized solutions for inspection, measurement, testing requirements, and design and development for technical furniture. Being a supplier of state-of-the-art equipment, the company has a diversified, unique brand portfolio, from top producers such as Hirox, Ash, Inspecto, Motic, Jenoptik, Viking and others. Along with the digital microscopes we are proud to serve successfully in various configurations laboratories and production lines, we also present automatic robotic inspection system, based on Artificial Intelligence and Deep Learning.

Stand 29

Modpack System

MODPACK SYSTEM is a global leader in machine installation and relocation, providing fully inclusive solutions since 2007. We specialize in industrial relocations, factory transfers, export packing, project cargo, and multimodal transport across road, rail, sea, and air. Our fully integrated services cover every stage, from engineering and logistics to installation and post-relocation support.

Stand 30

CRG Industrial Services

We support technological evolution through innovative optimization systems in order to develop as many solutions as possible to improve the production process in as many fields of application as possible. From CAD design, to CAM programming for mold making. CRG uses collaborations with the best professionals in the mold sector, from prototype mold to series production molds for any sector (Automotive, Home Appliances, Electrification, etc.) With extensive experience in making Control Devices, we provide our partners with the best solutions to support their needs.

Stand 31

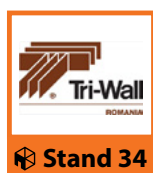

Stand 32

Heilind Electronics

Heilind Electronics is one of the world's leading distributors for interconnect, electromechanical, and sensor products. As the industry's preeminent distributor, Heilind stocks the largest inventory of connector products in North America. We are franchised for over 150 of the industry's leading manufacturers, and offer products in over 25 component categories including connectors, relays, sensors, switches, thermal management and circuit protection products, terminal blocks, antennas, wire and cable, wiring accessories, insulation and identification products.

Stand 33

Tri-Wall Romania

We are a global company with more than 60 years presence on the market, working to locally deliver the best packaging solutions that: save time and labour; reduce costs; improve efficiency. Support sustainability through our customers' supply chain. We produce heavy duty packaging for big industrial products or small, fragile ones for delivery on a global scale – locally, nationally and internationally.

Stand 34

Excior Romania

EXCOR is a trailblazer in the field of corrosion protection applying the VCI method. For over 20 years EXCOR has been marketing VCI films. Over that period the company has paved the way for highly effective corrosion protection solutions involving patented VCI products. Today there is a solution for virtually any need.

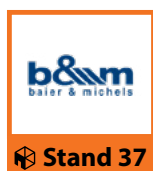

Stand 35

Compa

We are a company with more than 135 years of experience in metal manufacturing industry, a company that cares for values as understanding and respect for the client, investment in people and respect for the environment. COMPA is set to maintain the professional etiquette at the highest standards by bringing higher added value for customers based on diversity of skills, increasing business with OEM's and also the non automotive business, an intense activity which is part of our core strategy for the next years.

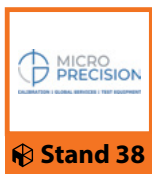

Stand 36

baier&michels

baier&michels is a worldwide operating developer and producer of special fasteners. We are mainly active in the automotive industry but we work also with different industry areas. We are looking for new partners in the Eastern-Europe.

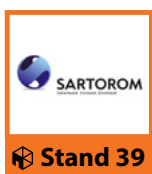

Stand 37

Micro Precision Calibration

Accredited Calibration Services. Micro Precision's equipment calibration services are designed to ensure that your equipment is performing accurately and reliably. As an Industry leader providing equipment calibration services since 1969, Micro Precision services a broad range of applications and industry sectors globally with instrument calibration, repair, validation, and other services. Laboratory Calibration: - Micro Precision is a leading calibration solutions provider that operates 50 laboratories globally.

Stand 38

Sartorom

Sartorom, the first laboratory equipment company founded after 1989, with fully Romanian capital, celebrates 34 years of activity in Romania. Our services focus on delivering complete solutions for laboratories in all industries, including research and development, production or quality control. We are the first supplier of laboratory instruments in Romania to be ISO 9001 certified and ISO 17025 accredited as a calibration lab.

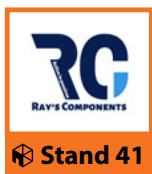

Stand 39

Effective Flux

Consulting, training and digitalisation services provider. We proved our competences through over 60 consulting projects for capacity increase, Lean deployment, logistics, quality (QMS, customer complaints, problem solving) as well as with over 500 real project improvement using DMAIC (Six Sigma) with advanced statistics. We delivered trainings to over 500 companies for quality (including specific automotive), time study, engineering, lean, Six Sigma, MINITAB, maintenance, logistics, MsOffice and many other. We also offer consulting to select and design the appropriate training to fit customer needs. We implemented digitalisation systems such as Arkite platform - an AR Poka yoke for the manual operation. In our portfolio, there are also an AI based platform which reduce with one third the time to perform a time study, as well as an AI based platform for a fast and effective production planning.

Stand 40

Ray's Components

Ray's Components is a key player in the electronic components market, serving Hungary, Romania, and Slovenia. As a trusted regional sales representative, we bridge the gap between renowned manufacturers and customers, offering top-tier customer support and expertise. Our carefully curated portfolio includes resistors and shunts from KOA, capacitors from Jianghai, connectors from Adam-Tech, and DC contactors from Altran Magnetics. These collaborations highlight our commitment to excellence, ensuring superior quality and an unwavering dedication to customer satisfaction. Partnering with KOA guarantees a reliable source for resistors and shunts, while Jianghai's capacitors bring cutting-edge technology.

Stand 41

Injection Moulding Prilep DOOEL

Injection Moulding Prilep (IMP), part of ACCOMPLAST GmbH and Labone Holdings Ltd., is a leading global supplier of precision moldings for the automotive industry. Based in Prilep, North Macedonia, we specialize in injection molding, insert molding, assembly, and pad printing. Since 2015, we have partnered with top clients like Marquardt, Gentherm, Kostal, and Aptiv, delivering innovative solutions that meet the highest automotive standard.

Stand 42

OPTIMUM datamanagement solutions

Smart Klaus by OPTIMUM datamanagement solutions GmbH - Your specialist for camera-based assistance systems in automotive manufacturing. This leading worker assistance system enhances manual production processes through advanced image processing and efficient data management. Since 1993, OPTIMUM has been developing and refining innovative solutions for Industry 4.0 in Karlsruhe. Our extensive experience in the automotive industry, as well as in aerospace, electronics, and medical technology, makes us a trusted partner for companies across Europe, the USA, and Asia. Visit us at the AutoExpo in Sibiu to see how Smart Klaus can transform your production lines with precise error detection and real-time data feedback. Driven by curiosity, pioneering spirit, and optimism, we continually strive to make your manufacturing processes simpler, faster, and better.

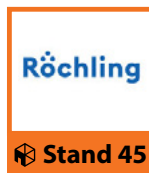

Stand 43

Celesta Comexim

Celesta Comexim is a company founded in 1993, leader in test and measurement equipment market for electrical, industrial and telecommunication field, covering a large area of applications. Our company is the authorized distributor of the following companies: - Yokogawa Europe B.v.; - VIAVI, (fost Aeroflex) Inc. (Cobham AvComm); - Aeroflex Wireless (Cobham Wireless); - Bird Technologies Group; - NTest Inc.; - Sumitomo Electric Europe Ltd.; - TrendIndustries Ltd.; - Digital Lightwave Inc.; - Franklin Electric (Midtronics Europe) - A.H. Systems Inc.

Stand 44

Röchling Precision Components

With 451 employees and annual sales of around 56 million euros, Röchling Precision Components is a specialist in precision injection molding production in an international environment. With technologically sophisticated plastic applications and a wide range of high-precision components, the RPC Group mainly supplies its strategic customers Bosch, ZF, Continental, ETO, RAPA, Daimler and Hella. With many years of experience, high efficiency and flexibility, the company meets market requirements and acts in a future-oriented and sustainable manner.

Stand 45

TotalEnergies

TotalEnergies is a global multi-energy company that produces and markets energies: oil and biofuels, natural gas and green gases, renewables and electricity. The local affiliate in Romania, TotalEnergies Marketing Romania manages three lines of activity: lubricants, bitumen and special fluids. We produce lubricants for the automotive and industrial segments in the factory located in Cristian - Braşov, and also exports 50% of its production to neighboring countries.

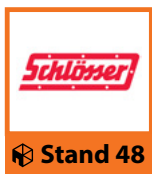

Stand 46

Werth Magyarország

Werth Hungary is a leading distributor of industrial coordinate measuring machines (CMM) and computed tomography (CT) systems in the region. With a focus on precision and innovation, we provide advanced metrology solutions to the automotive and plastics industries. Our mission is to help manufacturers achieve the highest quality standards by offering cutting-edge equipment, professional consultation, and technical support. As the exclusive representative of Werth Messtechnik in the region, we bring German engineering excellence closer to our partners. Whether it's complex component inspection or detailed 3D measurements, Werth is your trusted partner in metrology.

Stand 47

Schlösser

Schlösser GmbH Co KG has many years of experience in the field of producing stamped parts, water jet parts and laser beam parts. These technical parts are destined for sealing, venting, shielding, cooling, adhesive bonding, dampening and insulating and are produced in different geometries according to the customers drawings and their requirements. Sector solutions provided with Schlösser parts - Automotive, Electrical / Electronics, Construction / Sanitary, Mechanical Engineering.

Stand 48

Bora

Bora company was established in 1975 and has always been working in the sheet metal stamping industry, for Automotive and Home Appliances markets. We have a long experience, over 50 years, in designing and manufacturing of die tools, sheet metal stamping and in the last years we also developed FEM Analysis and simulation of stamping process. Today we can offer to our customers also co-design, prototyping, small assemblies and welding. We have two production plants, in Italy and Poland, with presses up to 2500 tons and 10 mm thicknesses. We have mechanical and hydraulic presses, equipped with progressive and transfer technology. We have spot welding machines and welding lines with robots, as well as different washing systems.

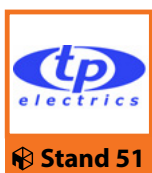

Stand 49

Anorom

The Anorom factory based in the Hunedoara Industrial Park has a history of over 20 years in the field of surface treatments for aluminum parts: hard anodizing, decorative anodizing, Surtec 650 chroming. We are ready to serve you impeccably and deliver treated aluminum parts in premium quality exactly when you need it.

Stand 50

TP Electrics

TP Electrics has multiple competences for cable harness assembly, from battery connections, to tapped or corrugated tube protected strings. Their PCB assembly aptitudes enable them to approach also complex projects and offer integrated solutions such as board assembled PCB, with cable wires attached, which enables the customers to only fit and connect on devices.

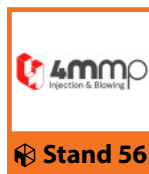

Stand 51

toledo | industrial packaging systems

Toledo has been a leading name in Romania's industrial packaging market since 1998, delivering innovative and reliable solutions that enhance efficiency and optimize production processes. Our expertise spans across state-of-the-art packaging equipment, advanced automation systems and tailored consultancy designed specifically to meet the unique needs of various industries. As the exclusive importer and distributor of premium European brands, Toledo ensures access to cutting-edge technology and superior quality equipment. We provide a comprehensive portfolio including strapping tools, strapping machines, pallet wrapping systems, conveyor systems, integrated palletizing and packaging lines and high-quality packaging materials. Understanding the importance of continuous operations, Toledo offers extensive post-sale services, from warranty and prompt spare parts availability to expert maintenance, repairs and equipment retrofitting. Flexible financing solutions like leasing, rental, and custody further support our clients' business growth and operational flexibility.

Stand 52
Stand 53
Stand 54
Stand 55

4M MP

+ 25 years experience in plastic injection or blow moulding for automotive and other industries. Our dedication to the quality of the products and services we deliver represents the foundation of our success.

Stand 56

ingun

World leading supplier of test solutions in electronics manufacturing. With a large portfolio of test probes, fixture kits and customising accessories, we are eager to fully support our customers and be a reliable partner for future technology!

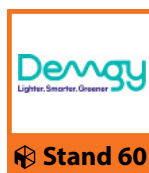

Stand 57

Bros Trading

For almost 20 years, Bros Trading has been a complete dealer for the supply of equipment for the industrial automation sector. With the desire to offer the most complete service to customers, we sell a diversified portfolio of products, including any type of mechanical, electrical and pneumatic components intended for industrial automation. The main customers are companies that make automation mainly in the automotive field, but not limited to this. We work with companies based in Romania as well as in Europe and outside the EU. Our mission is to respond to the needs of customers in the industrial automation sector by offering a complete service, at 360°, for each personalized need.

Stand 58
Stand 59

Demgy

Our MULTIPLASTURGY® concept allows us to simplify, LIGHTEN and implement your plastic projects, even the most complex. Expertise of the two factories in Romania (Fagaras and Deva): Thermoplastic injection

- Technical and decorative parts
- Over molding of inserts metallic
- Gas assisted injection
- Sequential injection Decoration
- Painting (water based and solvent based)
- Tampo printing
- Laser printing
- Serigraphy
- Hot stamping
- Roctool technology Chrome plating
- Cr6 and Cr3 technology (for plastic parts) Metal Electroplating
- Zinc coating (for metallic parts) Assembling
- Manual and semi automatic assembly
- Ultrasonic welding & assembly
- Screwing
- Control with vision systems Machining of plastic and metal.

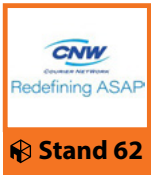

Stand 60

Diaplast Production

Diaplast Production has over 18 years of experience in plastic injection molding, extrusion and assembly. We are a leading supplier of plastic components for different industries, able to fulfill higher standards of fabrication/manufacturing, quality, packaging and logistics, specific on different markets. Our know-how, specialized team and technical capabilities allow us to assure for our customers complete services at higher standards.

Stand 61

Courier Network

When your expedited shipment needs to reach its destination fast, we do whatever it takes to make it happen. We are more than an international courier, we are your partner in emergency logistics. We understand your challenges and work tirelessly to find the perfect solution for every urgent shipment. Delivering customized, reliable and efficient NFO and hand-carry solutions for time and mission-critical shipments from anywhere to everywhere in the world. CNW is a major supplier in the Semiconductor and Automotive Industry. In an aircraft on ground situation, getting the plane back in the air is priority #1. With global 48 offices worldwide, plus an arsenal of loyal local logistics partners, CNW is ready to take on your logistic challenges

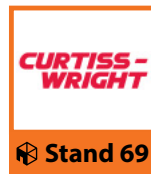

Inmaacro

INMAACRO is the technical and commercial representative of companies from Germany, Switzerland, Holland, Italy and Taiwan which are producers of machine tools, measuring and control machines, cutting tools, accessories and software. Also, INMAACRO manufactures custom made tools, custom made clamping devices for machine tools and coordinate measuring machines, molds, precision parts, automation. Our specialists realize customer specific applications, commissioning, trainings, service, calibrations, turn-key projects, CAD design, CAM programming, measuring and control of parts, production start-up and AUKOM training.

Somipress Romania

SOMIPRESS ROMANIA is a company part of SOMIGroup an Italian group founded in 1972, working in the field of aluminium die-casting. It supplies high-quality aluminium die-casted parts to the Automotive, Household Appliances and Mechanical industries companies. SOMIPRESS is able to carry out, besides the die-casting process, surface treatments, mechanical machining and assembly operations. All the work is carried out with the help of state-of-art machineries, which are continuously updated. We continue to develop innovative and perfect products, working in co-design with customers.

Curtiss-Wright Surface Technologies

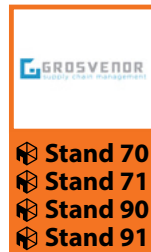

The Curtiss-Wright Surface Technologies Ltd. as a part of Curtiss-Wright [NYSE:CW] offers various, highly engineered surface treatment solutions like laser and shot peening, engineered coatings and C.A.S.E. superfinishing. Our customers are connected with the general industry, automotive, aerospace and defense. In Békéscsaba we currently offer shot peening services to our customers to improve their components resistance to metal fatigue, stress corrosion cracking, exfoliation corrosion, fretting, galling, spalling and general wear.

Advantage Austria

ADVANTAGE AUSTRIA is the official Austrian Foreign Trade Promotion Organisation and forms part of the Austrian Federal Economic Chamber (WKÖ). We represent the following Austrian companies at this event:

- Friedrich Deutsch Metallwerk GmbH | Metal processing & Tooling technology
- INOCON Technologie GmbH | Welding & Surface technology, Machine construction
- TCM International Tool Consulting & Management GmbH | Tool management for productivity
- Transiris Austria GmbH | Integrated Digital Marketing Agency

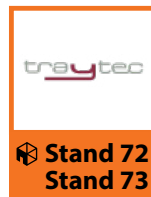

Grosvenor SCM

Grosvenor SCM, with the Head Office in Romania and operations in 6 countries, is one of the most important distributor in Electronic & Automotive Industry. With an experience of 18 years in the market we, continuously, adapt and improve our portfolio of products and services to help our customers in any demanding situation. Over the years, Grosvenor has developed strategic partnerships with leading manufacturers, helping us to serve our customers in Eastern European market at the highest level.

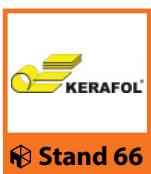

Klarwin

Klarwin® is the European leader specialized in innovative solutions in the field of applied engineering for fluids filtration and purification, water treatment and turn-key solutions for various processes and applications with the most comprehensive integrated process control and real-time monitoring systems preferred by its clients for its know-how and valuable cross industries expertise that brings impact in businesses through optimization, efficiency, and alignment to global sustainability standards.

Traytec Thermoforming

At Traytec Thermoforming we pride ourselves on delivering innovative and sustainable solutions in thermoformed packaging and component manufacturing. Equipped with two state-of-the-art ILLIG production lines and plans to expand with four additional lines, we are well-positioned to meet the growing demands of our clients. Our expertise encompasses the production of trays and components using a wide range of materials, including ABS, ABS-TPU, ABS-TPU (ESD), PS, PS (ESD), PE, PP, PET, PET-A, PET-G, PET GAG, PET-A/PE, with thicknesses ranging from 0.3 to 12 mm. This versatility allows us to address diverse industry needs and maintain our reputation as a leader in the market.

Kerafol Keramische Folien

The family-run company KERAFOL® specializes in thermal management and technical ceramics. Thanks to our decades of experience and state-of-the-art process technology, we develop and manufacture high-quality technical products for various markets. KERAFOL® is the specialist for all aspects of thermal management. With almost 300 employees, we are involved in the development and production of thermal interface materials (KERATHERM®) and thermally conductive injection-molded granules (KERAMOLD®). In line with the motto "KERAFOL® makes electronics cool", KERAFOL® products have been used in electronic assemblies for many years, and the electrification of the drive train in the mobility sector has led to many other new areas of application.

Zynk Software

CODENO is the ultimate solution for manufacturing companies seeking to optimize operations, enhance productivity, and achieve industry excellence. With streamlined production processes, data-driven decision-making, and supply chain optimization, CODENO enables businesses to stay ahead in today's competitive landscape. With scalability and flexibility at its core, CODENO adapts to evolving business needs, driving growth and success in the manufacturing industry.

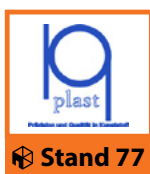

Multitech

At Multitech, we provide equipment, consumables, and industry-specific solutions from the world's leading manufacturers in marking, labeling, and automation. We proudly represent top brands such as Videojet, Foba, and Universal Robots. We always provide customized solutions, and our goal is to optimize your costs and work together to find the best solutions to the challenges you face. Our technologies are present in your everyday life, ensuring product safety and production line efficiency, whether in the food and beverage industry, pharmaceuticals, construction materials, or industrial components.

DAV Tech

DAV Tech is an Italian company specializing in the design, manufacturing, and distribution of components and systems for precision industrial dosing. Over the years, DAV Tech has grown and structured itself, becoming a supplier to some of the most prominent companies in Italy and abroad, operating in various industrial sectors, including automotive, electronics, mechanics, and home appliances, to name a few. DAV Tech aims to position itself not merely as a supplier of components but as a partner with whom clients can collaborate to develop any type of application. This relationship begins with preliminary testing, proceeds with proposals, materializes in orders and project execution, and continues with essential post-sales support. When required, the offering is further enhanced by the development of dedicated dosing automation systems, complete with all necessary certifications and markings.

PQ Plast

PQ = Precision & Quality 1966: Gentner GmbH was founded - german family business. Constant improvement of the quality policy, trust towards customers leads to satisfied customers and long relationships. 2011: PQ-Plast SRL/Arad-was founded. TODAY: more freedom, more responsibility. PQ-PLAST creates high-quality technical and functional plastic systems. Our know-how: development, tool making, injection molding, assembly, leathering & painting. Established processes: fully automated, fully controlled, traceability, environmental awareness, and ... german reliability in Romania. "WE CANNOT BE AVERAGE!"

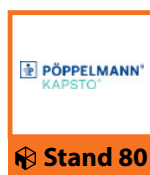

ACS Industries

At ACS, we manufacture critical components used in systems assemblies for a wide range of products spanning Green Energy, Clean Air Exhaust, Vehicle Safety and more. ACS is the world's preeminent manufacturer of pyrotechnic airbag inflator filters coolants, and cushions. We are the only company to offer all the preferred filter media of knitted wire mesh, woven wire mesh, micro expanded metal, and sintered wound-wire. We also offer a wide array of automotive exhaust components from hot and cold end filters to sintered urea mixers and more.

Edorom Metal

EDOROM METAL was founded in 2004 and is located in Geogiu, Hunedoara County, Romania. The main activity of EDOROM METAL is cold plastic deformation, including the following processes: stamping, cutting / punching, progressive stamping and press assembly. Our equipment: automatic presses with a capacity between 40 and 250 Tf.

Pöppelmann

Pöppelmann KAPSTO® – Plastic protective caps and plugs for every application. Our KAPSTO® protective caps and plugs ensure optimum protection during production, storage and transport. Every protection element of our KAPSTO® standard program with over 3,000 versions perfectly protects your application. – All individually tailored according to your requirements. Whether robust, low-abrasion, temperature resistant or sealing – you will find the right protective element here.

MONTI-Werkzeuge

Removing, Cleaning, Profiling Cars, trains, planes, trams, tractors or trailers. MontiPower® has an extensive line of pneumatic, electric and cordless machines that provide cost-effective alternatives to prepare surfaces for adhesion, protection and finishing in the shop, plant or outdoor. Our direct-to-metal solutions reduce labor costs, improve safety, increase production and positively impact your bottom line. We have been supplying the automotive industry since 1987 and know the importance of speed and performance. Our metal surface preparation tools are very adaptable to any shape and offer benefits that result from savings on logistics, better adhesive performance and fewer repairs, repaints or call-backs.

Cellutec

Whether it's boxes, shims, racks, technical parts, insulation applications (thermal and/or acoustic), our design team will support you and provide you with the right solutions to the challenges you face. Our superior technological endowments combined with our know-how have propelled us as a reliable partner for renowned brands from all over the world, operating in industries as diverse as automotive, electronics, medical, metallurgy, etc.

ALPHR Technology Europe

ALPHR Technology is a global market leader providing high-end Factory Automation solutions, specialized in Test & Measurement, Advanced Robotics, and world-class Modular Solutions.

Procadimoldes

PROCADIMOLDES is a family owned company, established in 1994, in the manufacturing of plastic injection molds and is ISO 9001:2015 accredited since 2014. KNOW-HOW: Multi Components tools (2K & 3K), using several technologies (rotary system, transfer, index plate, core-back); Sandwich tools (Stackmold), Multi-cavities high performance tools for technical parts, Variotherm Technology (Heat & Cool), Gas Injection (GIT), Inserts overmolding, Thermoset injection molding (BMC – bulk molding compound), Automatic unscrewing system. MARKETS: Automotive, Home Appliances, Pharma and Medical Equipment, Electrical and Electronic Parts. Tools up to 15 Tons.

Stepan & Co

Stepan & Co is a commercial company that produces spring contact probes for the electrical test of electronic devices and wire harnesses. Stepan&Co represents Feinmetall Germany, Viscom Germany (XRay, AOI, SPI), Montratec Germany and other companies in the industry of electronics.

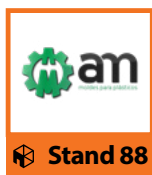

Leonardo Group

Leonardo Group Kft., a dynamic force since 2005, is part of the esteemed Leonardo Group AG, with a strategic presence in Europe, the USA, and China. As the sole representative of Orgatex in Romania and Hungary, Leonardo Group Kft. is dedicated to elevating workplace organization standards. Through our exclusive partnership, we provide cutting-edge solutions tailored to enhance efficiency and productivity.

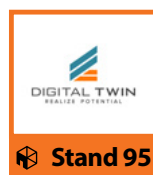

Grupo Moldoeste

We are a mould-maker company with production facilities in Portugal. With two production sites, we manufacture moulds up to 3 T in one site and up to 50T in the second production site. We specialize in highly technical and precise components and several technologies, and we work mainly for the automotive industry. We have our own trial company, with injection moulding machines where we test our moulds and produce parts. We are searching for new customers in the field of mouldmaking and serial production.

AM Moldes para Plásticos

A&M Moldes is a company dedicated to the production of plastic injection tools. It was founded in 1988, in Oliveira de Azeméis, and has been run by its founder Manuel Moreira ever since. It is a company that differentiates itself through the production of high quality tools, ensuring the established delivery time and with an irreproachable product quality. A&M is recognized for its strong customer orientation strategy, and it's able to build tools up to 35Ton. Over the years, A&M Moldes has acquired a vast experience, which allows us to produce all type of tools, like standard tools, rotatives (multi material and multi-color), compression tools, fusion injection tools, and much more... Following the goal of continuous improvement, the companies Quality Management System was certificated in 2006 (ISO 9001:2015).

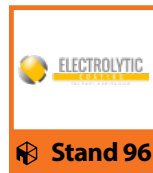

Digital Twin

Digital Twin, a Siemens Digital Industries Software partner in Romania, provides advanced digital product development solutions, offering professional R&D services and a trusted partnership for the full digitalization of design and manufacturing processes. With a team of experts boasting over 20 years of experience, the company has successfully implemented sustainable solutions for industries such as automotive, aerospace, machinery, and consumer goods. Digital Twin supports industrial companies in developing products, optimizing processes, and unlocking their specialists' true innovative potential through cutting-edge technology.

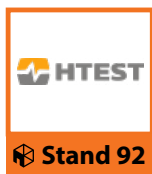

VSV Moldes

VSV MOLDES is a Portuguese company specialized in manufacturing Injection Molds for the Plastic Industry and Die-Casting Molds. It has around 45 employees. Produces 80 to 90 molds annually. The weight limit for tools is 4.5 tons (small to mid-size tools). Specializes in fine milling, achieving radii as small as 0.1 - 0.15 mm with excellent surface finish. Primarily produces molds for lighting products (reflectors, optics, light guides). Expertise in 2K tools, gas-assisted injection, over-molding, and die-casting.

Electrolytic Coating

Founded in 2013, Electrolytic Coating has established itself as one of the leading companies for surface treatment in Romania, currently supplying local and external customers. We're providing high alloy zinc coating (ZnNi) on metal parts for automotive industry under IATF16949 certification. Technology available: rack and barrel.

H Test Romania

H TEST company is a leading supplier of test & measurement instruments and systems for industry, education and telecommunications. We are currently operating in the Czech republic, Romania, Slovakia, Austria and Hungary. We are offering instruments and systems for measurement of electrical and non-electrical quantities, telecom and datacom networks. Beside Keysight Technologies test and measurement products we are also supplying test instruments and accessories from other renowned manufactures Hioki, Chroma, GW Instek, PMK, Elektro Automatik, Pico and others.

NDT1 Kraft

Our company specializes in supplying equipment for non-destructive testing. Our devices cover the following inspection methods: ultrasonic spot weld testing, ultrasonic thickness gauging, hardness testing, electromagnetic testing of coatings and materials, gloss measurements.

Trane Romania

Trane is a manufacturer of heating, ventilation, and air conditioning (HVAC) systems, along with building management systems and controls. The company is a subsidiary of Trane Technologies, a company focused on manufacturing HVAC and refrigeration systems.

Grupo SOCEM

Grupo SOCEM is a group of molds and plastics companies with 38 years of experience. They have 6 plants in Portugal, one in Brazil, and another in Mexico. The company also has local partnerships in the US, UK, Turkey, South Africa, Czechia, and China. Grupo SOCEM specializes in molds for plastics and die-casting, offering services like: Design & Engineering CAE (Computer-Aided Engineering) Additive Manufacturing (plastics, metal, resins) Prototype Molds Serial Molds (2K/3K, IMD, IML, Variotherm, Gas-assisted, Overmolding, etc.) Surface Finishing Checking Fixtures & Gauges EOAT (End of Arm Tooling) Low- & Mass-Production 100% Renewable Energy Usage in Portuguese units.

CR Moulds

CR Moulds is a company with 24 years of expertise on manufacturing moulds for plastic injection moulding. It's a company that invests in technology and know-how to answer to the most demanding requests of the market. CR Moulds promotes a distinct support to its customers, being present at its facilities whenever needed. The company is committed with quality control, which it considers a key point for achieving efficiency and continuous improvement. CR Moulds works for different sectors of activity such as automotive, electrical and electronic, houseware and medical and for different countries all around the world.

FozMoldes

FozMoldes is a Portuguese moldmaker establish since 1996. We are specialist in plastic injection tool for Automotive and other areas with similar level of quality.

Würth Elektronik

Würth Elektronik eiSos GmbH & Co. KG is a manufacturer of electronic and electromechanical components for the electronics industry and a technology enabler for future-oriented electronics solutions. The product portfolio of Würth Elektronik eiSos includes: EMC components, inductors, transformers, RF components, varistors, capacitors, resistors, crystals, oscillators, power modules, wireless power transfer, optoelectronics, sensors, radio modules, connectors, REDCUBE terminals, switches and buttons, assembly technology as well as thermal management. Würth Elektronik eiSos is active in 43 countries around the world through direct sales. 14 production facilities, spread over all important world markets, guarantee a fast supply of components.

Institut pro testování a certifikaci

Institut pro testování a certifikaci (Institute for testing and certification) is the Czech independent company providing services in the area of testing, certification, technical inspection, metrology and standardization.

Nutechnologies

Nutechnologies is an ambitious company, founded in 2012 and specialized in promoting innovative industrial equipment: 3D printers, laser systems for cutting, welding, 2D and 3D marking. We are an authorized technical and commercial representative for: Stratasys - the world leader in the production of professional 3D printers Trumpf - the world leader for SLM printing technology. Xjet - World's leading solution for Ceramics and Metal Additive Manufacturing (AM) at scale Sisma - the leader of the Italian laser systems market Materialise - the world leader in 3D printing software.

BIBUS SES

BIBUS SES provides solutions on the Romanian industrial equipment market. With over 75 years of experience in fluid technology, mechatronics and systems technology, BIBUS companies are an European network of competence and a close connection between major industrial equipment manufacturers and industrial customers.

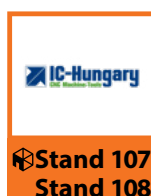

ProDSP

ProDSP is a dynamic and adaptable Design and Development Center established in 2008. We have supplied our partners with the latest solutions of engineering technology. Having pursued academic careers, our lead engineers have built ProDSP using their extensive knowledge in electrical engineering and measurement technology. Having met the expectations of the global marketplace and reached high standards, we have become a key player among automotive industry suppliers. Today, we offer unique and market-leading solutions for automotive testing, industrial electronics and electromobility. We are our clients' go-to company thanks to our outstanding achievements in developing and manufacturing end-of-line testers, product validation test systems and unique cable harnesses.

GRAFE Polymer Solutions

About GRAFE in general: the GRAFE product range includes a wide range of colourant and additive master batches, as well as functional plastic compounds. One of the largest research and development departments in the industry is working on the latest technologies to bring smart functionality to plastics. The family business was founded in 1991 by the four Grafe brothers and today employs more than 300 people who develop and manufacture for the national and international market in a state-of-the-art plant in Blankenhain, Thuringia, Germany. GRAFE attaches great importance to quality management. The company is successfully certified according to ISO 9001:2015, IATF 16949:2016 and ISO 50001:2018.

IC-Hungary

IC-Hungary Kft. - Precision CNC Solutions IC-Hungary Kft. is a trusted supplier of high-quality CNC machines, serving Hungary and Romania with new and used industrial equipment. We proudly represent globally renowned brands such as Bihler, Sodick, Milltronics, and FinePart, providing cutting-edge solutions for various manufacturing sectors. As an official distributor of Bihler, we offer advanced stamping and forming systems, ensuring efficient automation for metal processing. Our Sodick EDM solutions, including wire and die sinker EDM machines, guarantee high-precision manufacturing for mold-making and for various parts production. Milltronics machining centers and CNC lathes combine robust American engineering with user-friendly controls, enhancing productivity.

BOLE Europe Technology

BOLE is a high-tech enterprises that focus on the research, development and manufacture of precision machinery equipment. It adopts the mode of technology from Germany, made in China, integrates design, manufacture, assembly, testing and sales, and provides complete and professional Injection Moulding devices for customers. BOLE Injection Moulding Machines are developed and directed by German experts. The range of products covers nearly 100 specifications and 6 main series, including high-precision Two-Platen DK series, hydraulic servo EK-S series, full-electric FE series, Carbon-Fiber Products Intelligent Moulding Line CIML series, high-speed HK series and multi-materials injection MK series. The range of clamping force is from 50 ton to 6800 ton, and the range of injection weight is from 65g to 60000g.

Aknel Industrial /Aknel Equipments

Aknel Industrial /Aknel Equipments is supplying lubricants specifically for machining area, air filtration devices for smoke, dust and wet particles. Also surface treatments and plastic injection area.

Stand 110

DS Smith Packaging

DS Smith is one of the leading global providers of corrugated cardboard packaging, as well as being active in recycling and paper manufacturing. The company plays a significant role in the value chain across various sectors, including e-commerce, FMCG, and industrial. With its mission to “Redefine Packaging for a Changing World” and its sustainability strategy “Now and Next,” DS Smith is committed to inspiring the transition to a circular economy. It offers multiple circular solutions to its customers and society at large by replacing problematic plastic materials, eliminating carbon from supply chains, and providing innovative recycling solutions. Headquartered in London and listed on the FTSE 100, DS Smith operates in 34 countries with approximately 34,000 employees. In Romania, DS Smith owns a coordination centre for recycling operations in Bucharest, two recycling depots in Stefanesti and Cluj-Napoca, a paper mill in Zărnești, two packaging production units in Ghimbav and Timisoara and three service centers, in Pitesti, Timișoara and Otopeni, Ilfov county, where a total of 650 employees work.

Stand 115

Japan Tool Group

Japan Tool Group is an importer and distributor of collaborative robots for manufacturing, retail and education, cutting tools, hand tools, measuring tools, in Romania with 20 years of experience with firms like: Duco Robots ,Union Tool Japan, Gedore, Martor, Tanoi Japan, Isawa Japan, Insize China...Collaborative robots offer competitive advantages to businesses with industries as metal processing, automotive, food&beverages, chemical, consumer electronics, health care, new retail, semiconductor, education. Applications of collaborative robots: welding, palletizing, loading and unloading, assembly, bin picking, gluing, insertion, polishing, quality inspection, screwdriving, transporting, entertainment.

Stand 111

Diederichs Karosserieteile

Diederichs - 60,000 different baody parts for 650 vehicle types! We are a globally successful specialist in the automotive sector and supply trading partners in more than 120 countries with high-quality body parts. We offer a wide range of body parts, lighting and air conditioning technology in a warehouse area of 34,000 square meters. We also have Europe's largest tuning range.

Stand 112

Naltek Solutions

Naltek Solutions is a company with a clear vision of the future, which consists of long term collaborations maintained to assure top quality electronic insulation materials from the Elantas Bectron product line. We believe that the result of the collaboration with us must always be a triangulation of the 3 most important elements: price, quality and sustainability. Our goal is to deliver the most efficient solution to any customer demands.

Stand 116

Quaker Houghton

Quaker Houghton (NYSE: KWR) is the global leader in industrial process fluids. With a robust presence around the world, including operations in over 25 countries, our customers include thousands of the world's most advanced and specialized steel, aluminum, automotive, aerospace, offshore, can, mining, and metalworking companies. Our high-performing, innovative and sustainable solutions are backed by best-in-class technology, deep process knowledge and customized services. With approximately 4,400 employees, including chemists, engineers and industry experts, we partner with our customers to improve their operations so they can run even more efficiently, even more effectively, whatever comes next.

Stand 113

Admasys RO

We provide the most extensive selection of 3D technologies available in the Romanian market, encompassing high-quality 3D printers and accessories, portable and metrological 3D scanners, software, consumables, materials, along with professional services ranging from expert consulting to bespoke solutions. Our offerings include everything from 3D printing, scanning, and modeling to comprehensive training, servicing, and friendly technical support, tailored to meet the specific needs of manufacturing companies.

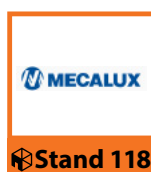

Stand 117

Levtech Service & Production

We are developing and manufacturing electronic devices for the industrial automation field. Our goal is to create high quality and reliable products with a competitive cost.

Stand 114

Mecalux Romania

Mecalux is a leading company in the storage systems industry, specializing in designing, manufacturing, selling, and servicing: Metal Racking Systems Automated Warehouses Other Storage Solutions Mecalux operates in over 70 countries and is ranked 3rd globally in its field. The company's expansion is driven by: Opening new branches Expanding its sales distribution network R&D investment Development of its automated warehouse division Running the Logismarket logistics portal Manufacturing Facilities: Spain (Barcelona, Gijón, Palencia) Poland (Gliwice) USA (Chicago, Sumter, Pontiac) Mexico Brazil (São Paulo) Argentina (Buenos Aires).

Stand 118

Vieweg

Our products range from simple hand-held devices to complex integrated "in-line" 4-axis robotic systems. All our equipment is supplied directly from our facility in Kranzberg. Our highly qualified engineers and customer service team provide full support to our customers in Romania, Germany, Austria, France, Switzerland, Czech Republic as well as many other countries in Eastern Europe. We enable perfect dispensing of Adhesives Cyanoacrylates Solder pastes Thermal compounds Greases Oils Sealants Silicone.

Stand 119

Büttner

Büttner Ltd. is a Hungarian company specializing in CNC machining and metal raw material trade, with a focus on the semiconductor, mechanical engineering, and automotive industries.

Stand 120

ProMold Sib

Manufacturing company in Sibiu with know how in high precision metallic parts production, machining of serial production and manual or semi-automatic assembly.

Stand 121

Litens Automotive Eastern Europe

At Litens Aftermarket, our mission is to empower vehicles with unparalleled performance and reliability through innovative aftermarket solutions. Committed to excellence, we strive to deliver cutting-edge products that enhance driving experiences, ensuring confidence in the longevity and efficiency of the vehicles. By blending advanced technology with a passion for automotive excellence, Litens Aftermarket aims to be the trusted choice for those seeking superior aftermarket solutions worldwide.

Stand 122

Horse Romania

Horse Mioveni is one of the most complex powertrain plants on account of the number of products and processes it handles. It has been producing aluminium parts, engines and transmissions for Dacia, Renault, Nissan, Mitsubishi and Daimler for 52 years. It is also home to the largest aluminium foundry in Renault Group (and in Romania). It produces over one-third of the Group's total aluminium output and a significant portion of Renault Group's engine and transmission systems, including full 4x4 transmissions (a purpose-designed gearbox with a front module and final drive unit). The powertrain R&D Centre in Titu is a standard-setter for engine, gearbox and software development, and for calibration and testing facilities.

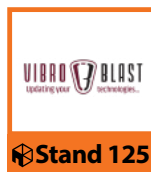

Stand 123

ProGlove

ProGlove is a smart wearable technology company specializing in industrial barcode scanning solutions. Their lightweight, ergonomic scanners enhance efficiency and accuracy in logistics, manufacturing, and retail by enabling hands-free, fast, and seamless data capture. ProGlove's solutions integrate easily with existing systems, improving worker productivity and reducing operational downtime.

Stand 124

Vibroblast

Vibroblast it's a Romanian company active in metal surface treatment field. We are representing in Romania important producers for machines and consumables in blasting (turbine and air compressed systems), shoot peening, vibrofinishing, washing, painting, filtration for particles, smog, or gases.

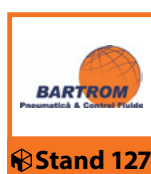

Stand 125

Great Master

Our company Great Master Ltd is an engineering company established in 2006 - Ruse, Bulgaria. Since 2014, the company has been an importer of products in the field of 3D technology and with the marketing name "GreMa 3D" Currently GreMa 3D is focused on offering complete solutions in the field of 3D technology. The company has its own equipment for demonstration or customer assistance, which includes professional industrial. Not a small share in our portfolio is the field of 3D services: Analysis, Design, Modeling, Scanning, Help in final control, Printing, Post-processing. We try to offer products with open systems, which allow our customers freedom in the choice of materials. The main focus is industrial technologies, but with an eye also on the private customer. Best regards, GreMa 3D.

Stand 126

Bartrom Exim

Bartrom - Your Supplier for Compressed Air Applications, Pneumatics, Vacuum Technology and Fluid Control. The increase in performance requirements and demands leads to substantial transformations regarding the reliability, precision and productivity of the technological process.

Stand 127

TotalEnergies

TotalEnergies is a global multi-energy company that produces and markets energies: oil and biofuels, natural gas and green gases, renewables and electricity. The local affiliate in Romania, TotalEnergies Marketing Romania manages three lines of activity: lubricants, bitumen and special fluids.

We produce lubricants for the automotive and industrial segments in the factory located in Cristian - Braşov, and also exports 50% of its production to neighboring countries.

Stand 128

Transilvania Business / InTradeFairs

Monthly magazine Transilvania Business is the sole premium publication mainly focused on economic activities in Transylvania and Banat - Romania, but also integrates articles about main national investments and projects and also international trends & events.

InTradeFairs is an online B2B and B2C platform for industrial companies, the organizer in Romania of the Automotive Expo, Industry Expo, Emsetech, Manufacturing Expo, Techology Expo and Logistics Expo trade fairs.

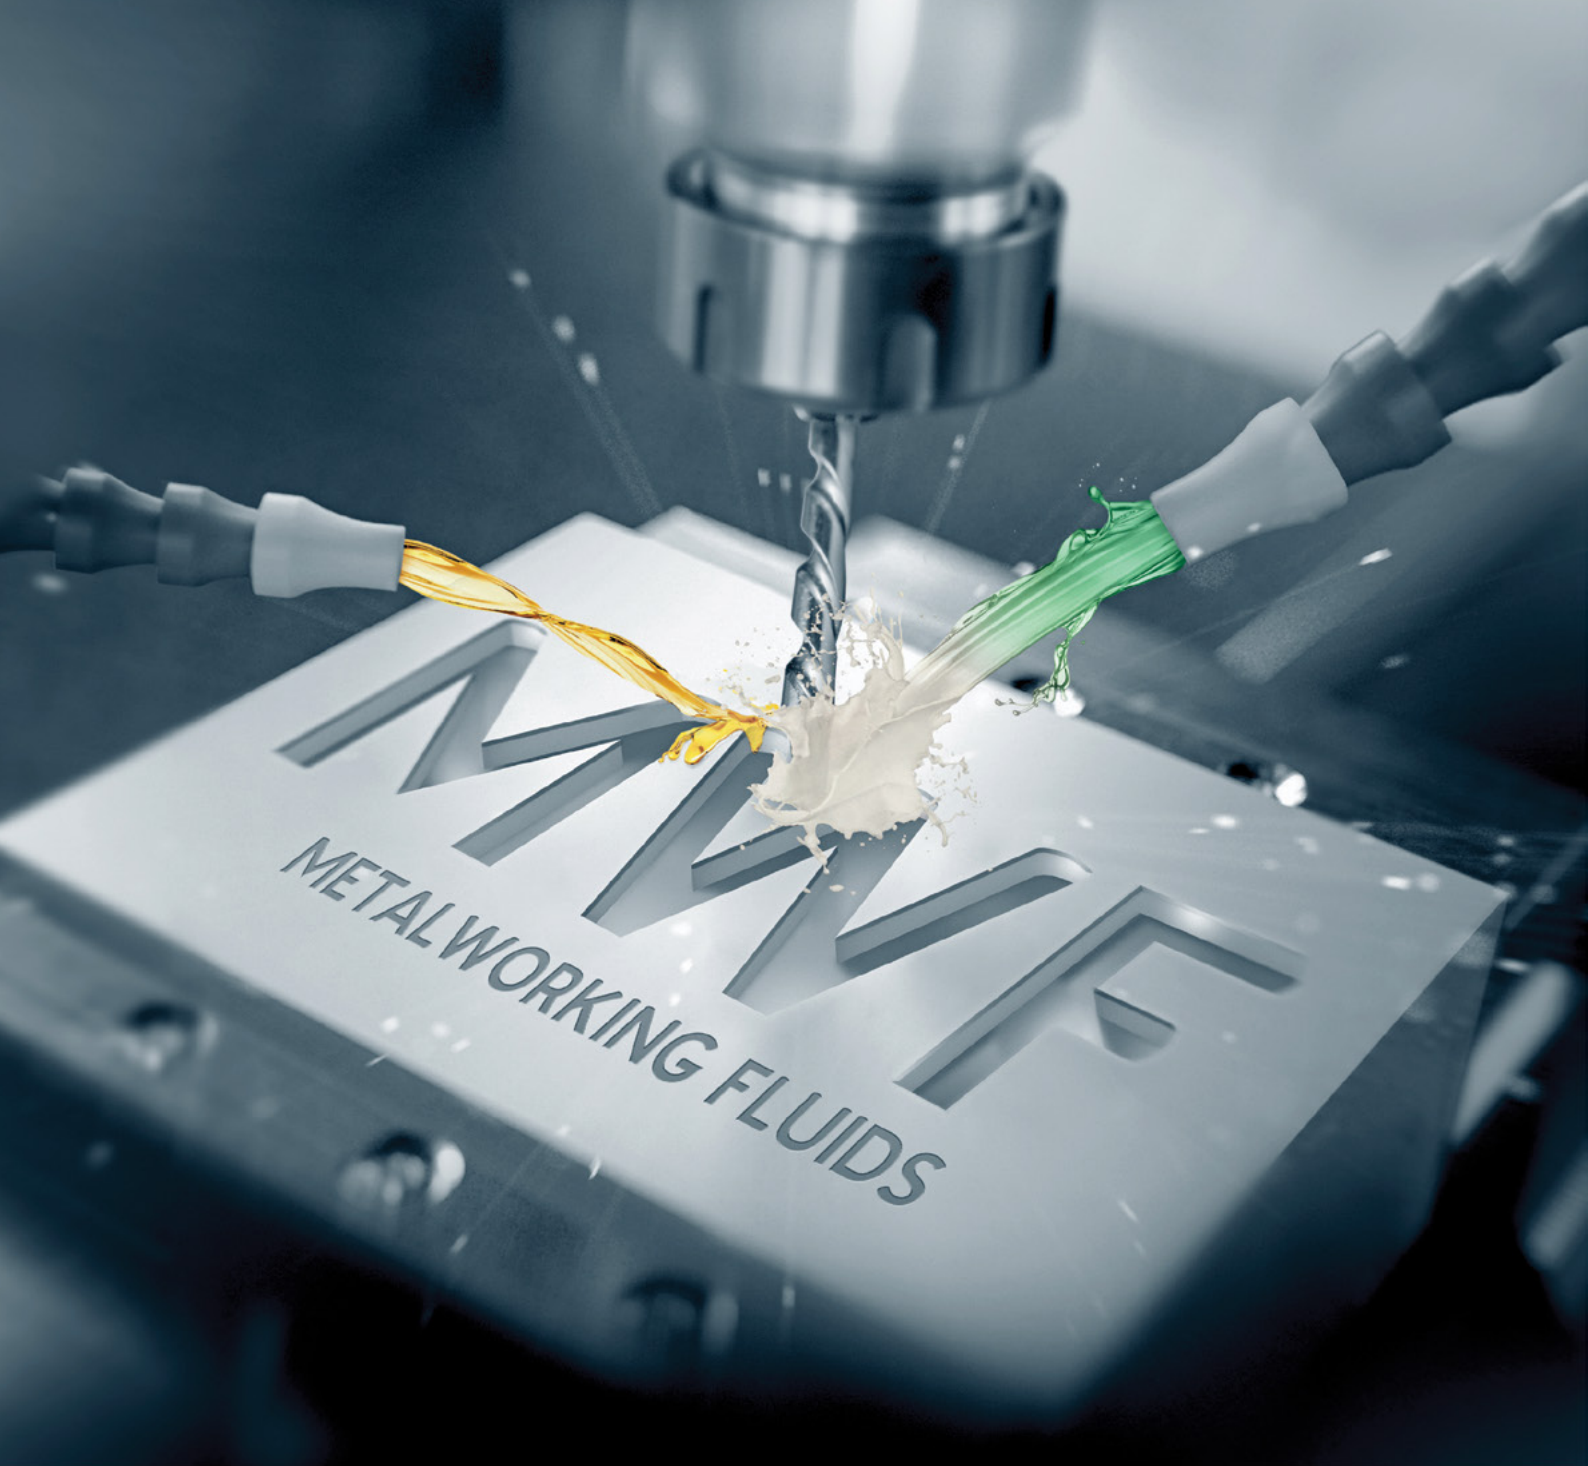

Stand 129

Sauter Turning Process

We manufacture turned parts and assemble assemblies for every customer and industry, whereby our core competencies are not only in the implementation of customer products, but also in process development and process management. We are happy to support our customers with our competence team right from the development of the "ideal" turned part for the assembly in order to achieve the most economical result right from the start.

Automotive packaging innovation

We help you transport and protect your product throughout the entire supply cycle.

Automotive standard packaging for global brands and component suppliers

Preventing goods from moving and getting damaged inside the packaging during transportation, storage and handling is as important as protecting them from external damage.

We therefore design, manufacture and supply a wide range of industrial cushioning solutions and protective packaging made of various materials with diverse protective properties.

Standard packaging solutions for the automotive segment

Key benefits

- **Ex-stock solutions:** We always have standard cases available for immediate dispatch
- **Short lead times:** Our bespoke designs take weeks rather than months from development to delivery
- **Low development costs** compared to other types of automotive packaging materials
- **Custom design and print.** Our tailor-made packaging solutions provide optimum protection for automotive parts and reflect your brand.

Pallet packaging solutions

Key benefits

- In addition to our standard dimensions, our pallet boxes can be tailor-made to your exact specification at no additional cost. They're customisable in height, flats, reinforcements, windows and more, and can also be supplied with interior fittings to optimise space and protect your product in transit.
- All our pallet boxes can be printed with your logo, branding and transport symbols to convey a professional image.

Packaging solutions for inside the box

Key benefits

- Dedicated inserts and separators for your products or components
- Buffers - dedicated, intelligently designed corrugated structures used to fill, shape, protect or add padding to packaged products
- Multi-material solutions - Replacing current materials with sustainable corrugated solutions or integrating additional materials into your packaging design to ensure perfect product protection.
