

Power Your Automotive Business with Green Energy

Todor Marinov, Deputy Chief
Commercial Officer at Enery

The Enery logo is positioned in the top right corner of the image. It features the word "ENERGY" in a white, sans-serif font, with the letter "E" stylized to include a circular element that resembles a power symbol or a stylized 'E' with a dot.

PPA CASE STUDY

Key points

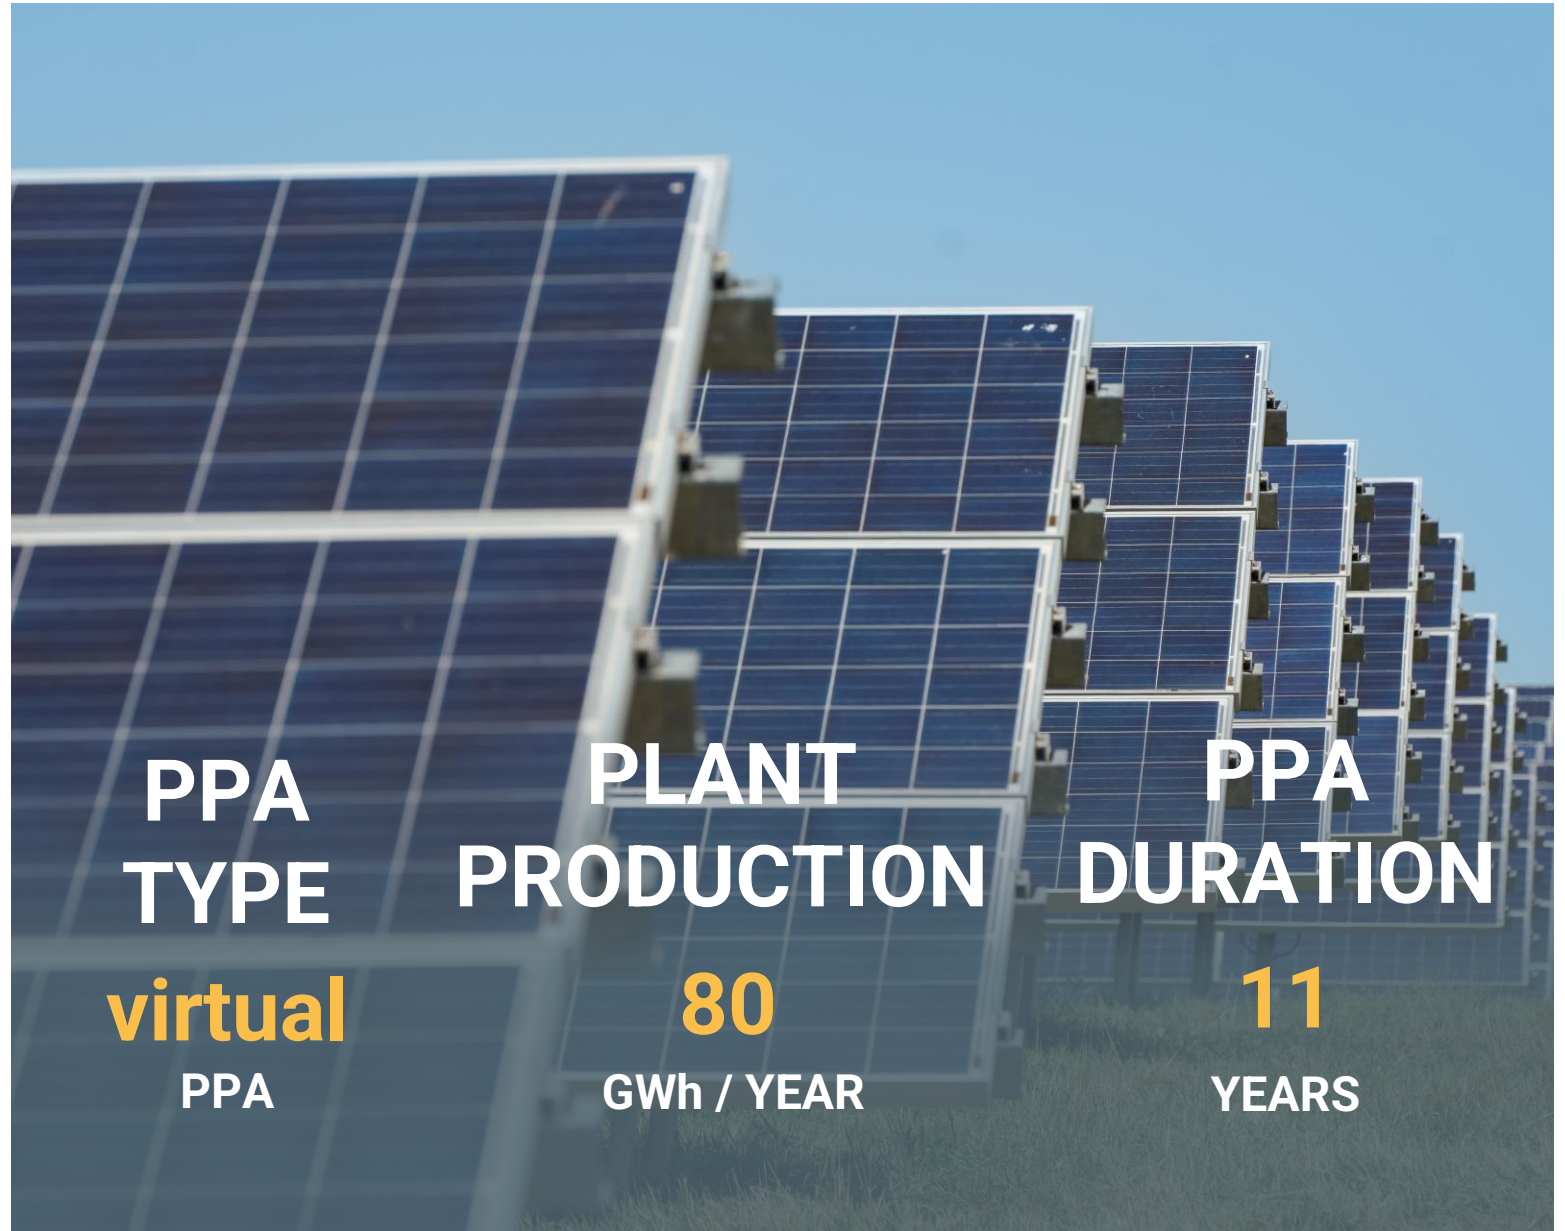

Nokian Tyres is building a new tire factory in Oradea, Romania. The facility will be the first full-scale zero-CO2 tire factory in the world thanks to the PPA with Enery.

Enery will supply clean energy from newly constructed PV assets with a capacity of 50 MW.

The project is designed to generate approximately 80 GWh of renewable energy annually. This is equivalent to supplying 47,226 homes with clean energy and saving 20,000 tons of CO2 emissions.

PPA CASE STUDY

Key points

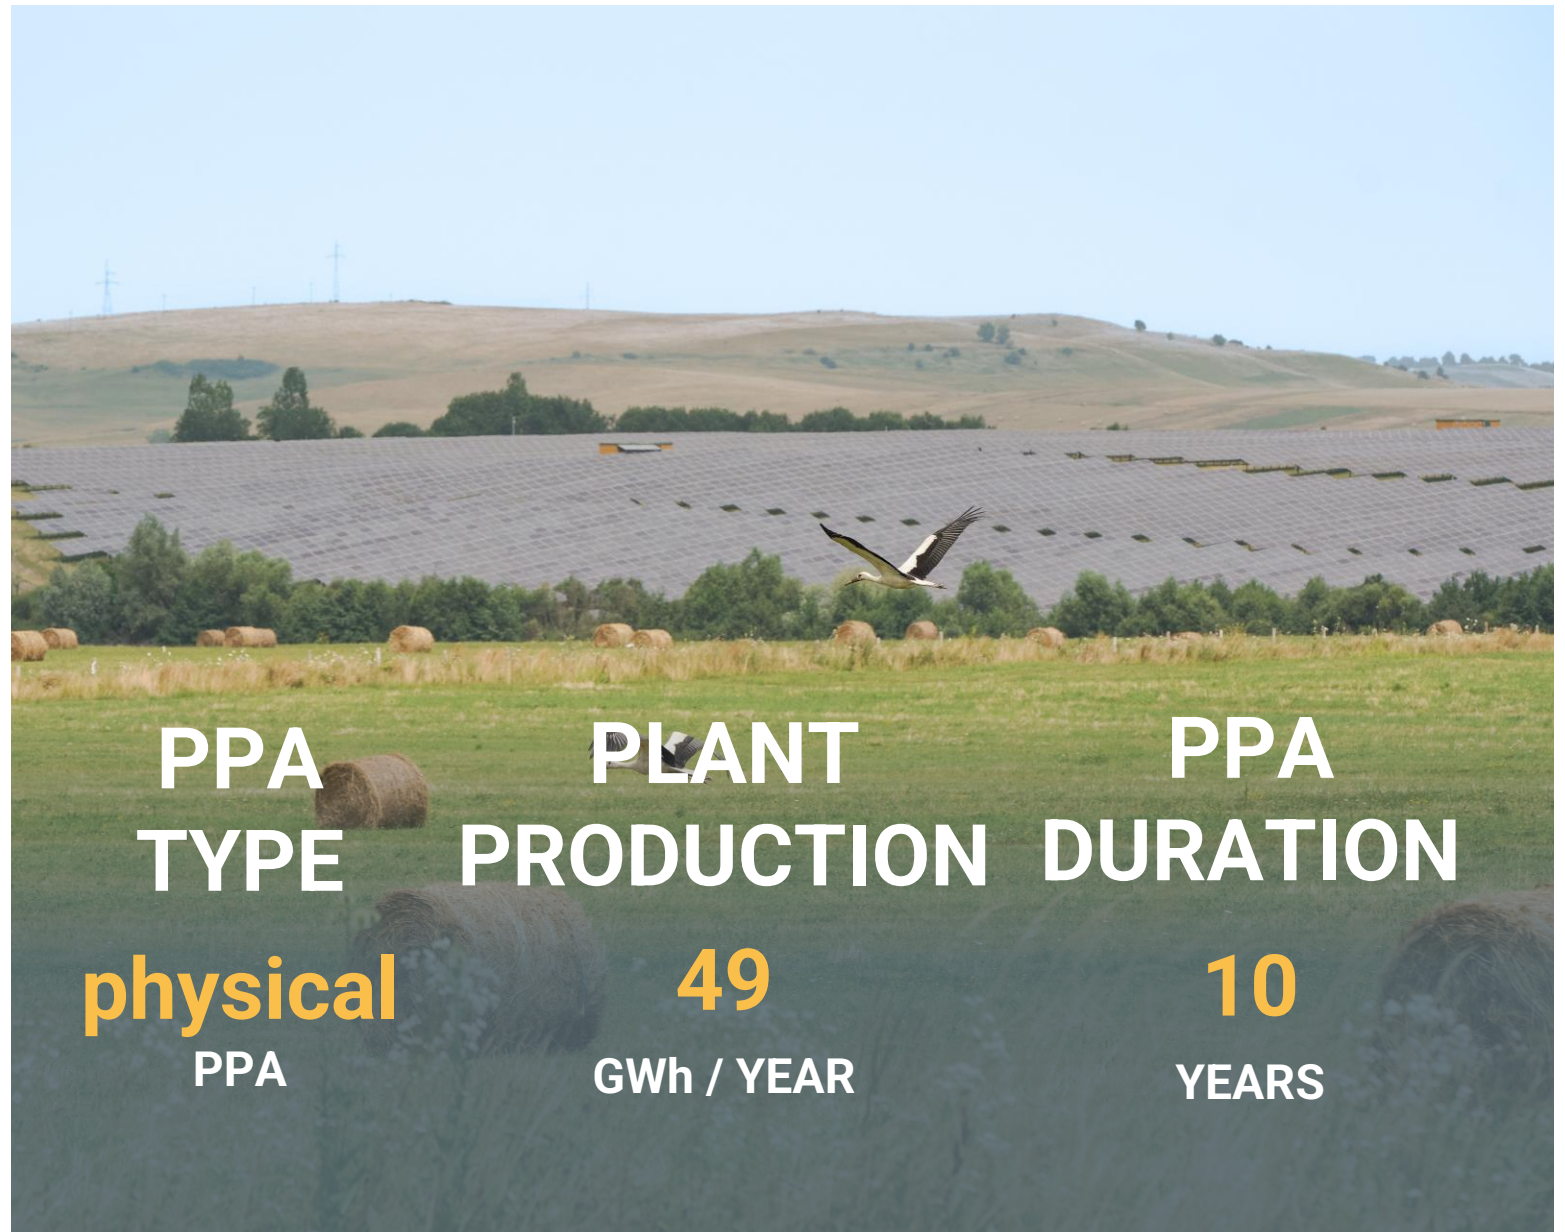

BENTELER is a global company serving customers in the automotive technology, energy, and mechanical engineering sectors.

The Czech subsidiary of the BENTELER Group chooses to secure electricity for its factory operations in the country through a PPA with Enery.

The physical PPA will fulfill the ESG targets of BENTELER by reducing Scope 1 and Scope 2 CO2 emissions.

PPA TYPE	PLANT PRODUCTION	PPA DURATION
physical PPA	49 GWh / YEAR	10 YEARS

Why Green PPA?

A green PPA with Enery unlocks many benefits for your business, making your company more attractive to customers, investors, financing institutions, and supply chain partners.

Reduce or completely offset your carbon footprint

Achieve your ESG goals and strengthen your corporate image

Plan your long-term electricity costs with confidence

Sign a customized agreement that fits your energy profile

Source green electricity from top-tier assets of the highest global standards

Thank you!
